

SchoolMoney are pleased to share that Apple Pay is now an available payment method.

Parents will be able to easily make payments with only a few taps, instead of typing out their card details each time. This creates a faster and more convenient checkout experience for parents.

This payment option is available when using the SchoolMoney App, and the desktop version on an Apple device such as iPhone, iPad, and Mac. Payments are made via Apple's wallet-based mobile payment

service. Payment authentication is achieved by fingerprint reading and facial recognition, as parents are securely guided through the payment journey.

Step 1

If supported by the parent's device, Apple Pay will be displayed as an option on your payment screen. Paying with a card is still an option available to parents.

Step 2

Once the Apple Pay button is tapped, (*providing Apple Pay has been previously set up*) the payment screen will present itself, displaying the order details.

Step 3

If parents have an Apple device but do not have Apple Pay set up, they will be prompted to set up their Apple Pay account before they can continue with the payment process. If you need more help, please view the video above.

Step 4

Once the parent places their finger on the built-in reader on the Apple device or enable facial recognition, their identity will be verified, and payment processing will commence.

Step 5

If successful, an on-screen confirmation will be displayed.
