The Western Wall

The wall is made out of huge stone blocks and nothing holds them together. The structural strength is obtained through exact and careful block stacking.

Every year tourists from all over the world leave over one million notes in the Wall's cracks, making their prayers to God. People believe that all the written down prayers placed in the Western Wall come true.

It is believed that when water comes through the stones of the Western Wall it is a sign that the coming of the Messiah is near.

The entire Western Wall is approximately 488 metres long.

Herod the Great constructed the oldest layers of the wall between 20 BC and 19 BC.

Seventeen more layers of Western Wall stones are buried under the ground.
