

## To know how to draw line graphs

- 1 Plot the data on the graph.

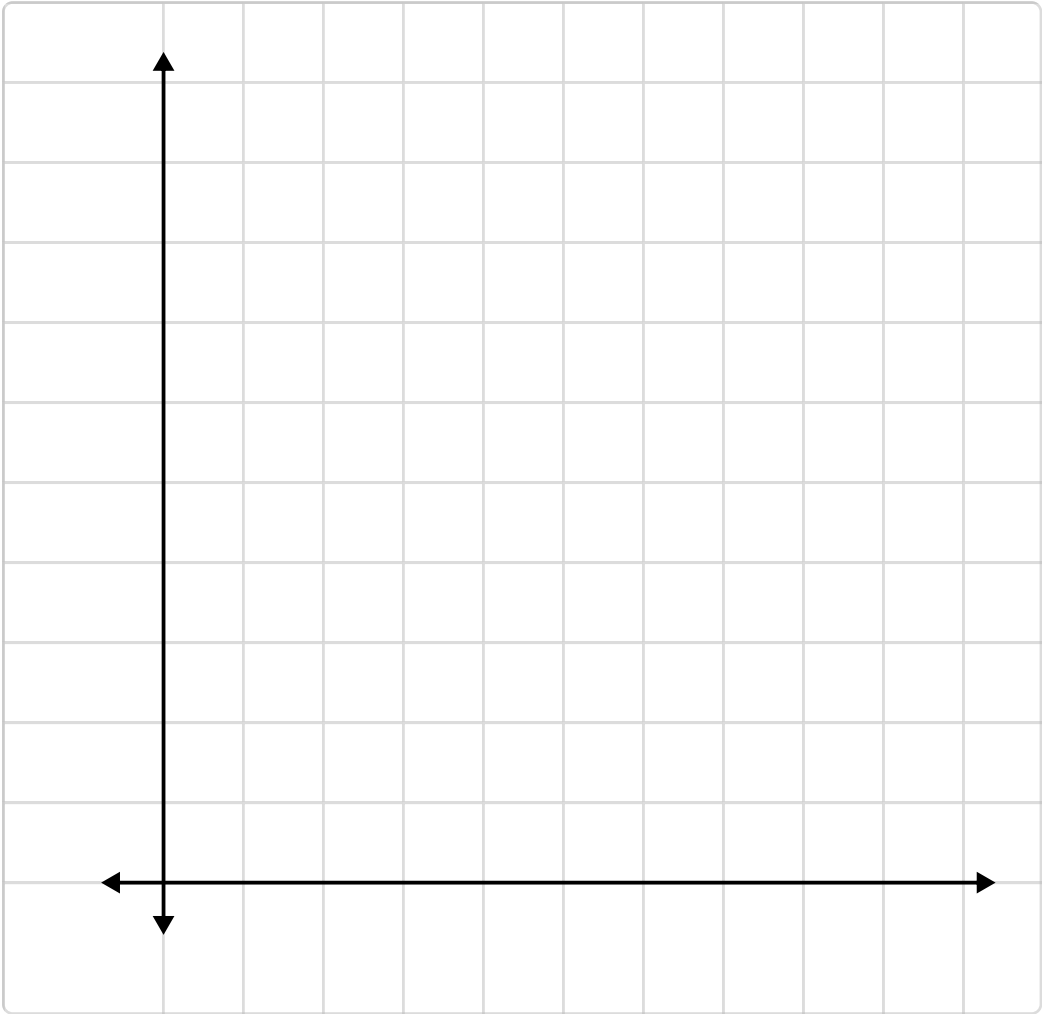

Time	8:00	8:30	9:00	9:30	10:00	10:30	11:00	11:30	12:00
Temperature (°C)	4	6	5	5	7	4	6	6	9

# To know how to draw line graphs

2 Create an accurate line graph for the given data.

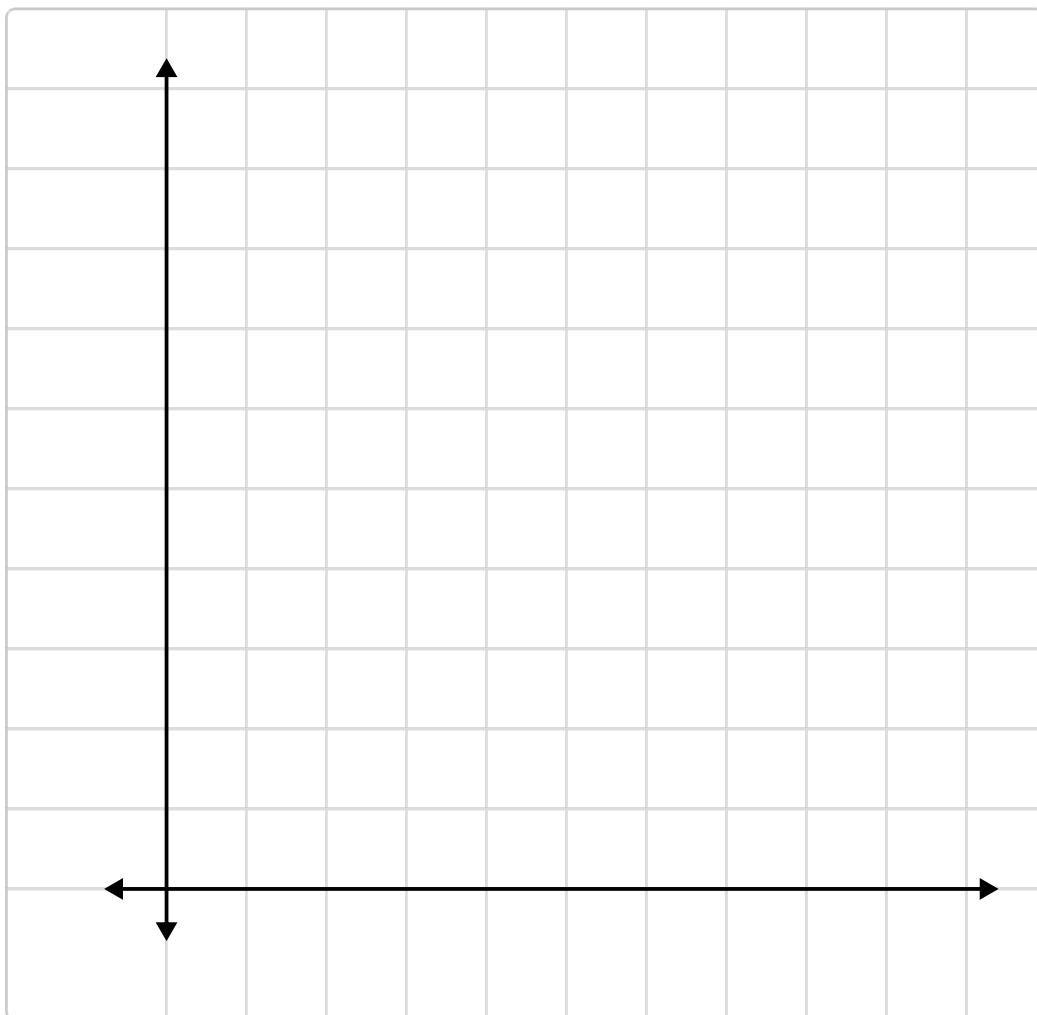

Rainfall in New York in the Summer						
Week	1	2	3	4	5	6
Rainfall (mm)	88	90	53	68	58	97

## To know how to draw line graphs

- 3 Use the table to record your heart rate, then complete the line graph.

Time (mins)	0	1	2	3	4
Heart rate (bpm)					

## To know how to draw line graphs

Question Number	Question	Answer
1	Plot the data on the graph.	The graph should accurately reflect the data provided.
2	Create an accurate line graph for the given data.	The graph should accurately reflect the data provided.
3	Use the table to record your heart rate, then complete the line graph.	The graph should accurately reflect the data collected.
