---

## INSTRUCTIONS TO MAKE PAPER PRACTICE THERMOMETER CRAFT

### STEP 1

Print off the thermometer image and cut it out. Using the glue stick, mat with a piece of left-over scrapbook or construction paper.

### STEP 2

Cut the straw to the size of the picture and then glue to paper.

### STEP 3

Cut the pipe cleaner 1/2 inch longer than the straw and insert into the straw.

---

### STEP 4

Use the hole punch to create a hanger for the practice thermometer with the ribbon.

## LEARN TO READ A THERMOMETER

Now your thermometer is ready for some fun!

- Have the child set the temperature at a certain degree.
- Have the child tell you where to place the temperature and then check if you are right... *don't always be right!*
- Display the thermometer in the kitchen and set it everyday with the current temperature.
